**Examiner's Amendment**

1. In Applicant's Response dated 01/09/2009, Applicant amendments to the claims overcome the prior art rejections and upon further search and consideration are allowed over the prior art.

All objections and rejections previously set forth are withdrawn.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Francis Maguire on 03/16/2009.

**Please amend the claims per the attached PDF document (See amended claims document)**

***Allowable Subject Matter***

2. Claims 1,6,8,12-15,17,19,21-23,26,28,30,32,34,39,40 and 52-60 are allowed.
3. The following is an examiner's statement of reasons for allowance

*Claims 1, 17, 23, 26, 34, and 40*

The closest prior art of Sommerer et al. teaches a system that creates a logical map of an HTML document. Each section of the document is divided into logical sections, which can be images, links, media and other content within a webpage. Sommerer teaches the user can select an item and the item is shown in the display at full size. Sommerer does not teach , scaling a web page that comprises an image map and further content to obtain a scaled web page, wherein said image map contains at least two image hyperlinks, making the scaled version of said image map in said scaled web page selectable as a whole presenting said scaled web page, and presenting only said image map with said at least two hyperlinks in un-scaled format in response to a selection of said selectable scaled version of said image map, as recited in the claims.

Art Unit: 2179

The prior art of Chen et al. teaches a system of browsing content on a small device where the content is transformed and scaled into sub-pages. The sub-pages of Chen are shown in a single page as sections of a page and when selected they are presented in full size along with the links within the page. Chen does not suggest scaling a web page that comprises an image map and further content to obtain a scaled web page, wherein said image map contains at least two image hyperlinks, making the scaled version of said image map in said scaled web page selectable as a whole presenting said scaled web page, and presenting only said image map with said at least two hyperlinks in un-scaled format in response to a selection of said selectable scaled version of said image map, as recited in the claims.

Therefore, the claims are allowed over the prior art, specifically for the feature of scaling a web page with an image map within it and converting the image map to be selectable as a whole and then upon selecting the image map presenting only the map in the screen with at least two selectable links in an un-scale format.

*Claims 6,8,12-15,19,21-22, 28,30,32, 39, and 52-60*

*These claims are dependent upon Claims 1, 17, 23, 26, 34, and 40, and are thus allowable.*

#### **101 issues**

Claims 1 and 34 have been amended to positively recite presenting a scaled web page on a display, which the examiner interprets tying the method claims to a particular apparatus.

Therefore the claims are interpreted to comply with the In re: Bilski test.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
